VMware Portfolio

VMware vSphere Enterprise Plus / VMware vSphere Standard

VMware vSphere 8 Enterprise Plus 1 Proc (LIC only)
SKU: 20001002

VMware vSphere 7 Enterprise Plus 1 Proc (LIC only)
SKU: 20001001

Short Description:

VMware vSphere provides a dynamic operating environment to manage large infrastructures (e.g. storage, networks and CPUs) and allows modern cloud infrastructures to be set up and operated.

With VMware vSphere, multiple virtual systems, operating systems and applications can be run on a single server with the highest level of data security. VMware vSphere runs on all possible platforms such as on Windows Server as well as MacOS, Linux and other operating systems.

VMware vSphere Enterprise Plus is the most important software for the virtualization of datacenters for the consolidation of servers and includes all features of VMware vSphere Standard plus additional features for IT administrators and experts.

Our offered VMware vSphere Enterprise Plus 1 Proc licenses are covering 32 Core.

VMware vSphere 8 Standard 1 Proc (LIC only)
SKU: 20001004

VMware vSphere 7 Standard 1 Proc (LIC only)
SKU: 20001003

Short Description:

VMware vSphere provides a dynamic operating environment to manage large infrastructures (e.g. storage, networks and CPUs) and allows modern cloud infrastructures to be set up and operated.

With VMware vSphere, multiple virtual systems, operating systems and applications can be run on a single server with the highest level of data security. VMware vSphere runs on all possible platforms such as on Windows Server as well as MacOS, Linux and other operating systems.

VMware vSphere Standard is the basic edition for the virtualization of datacenters for the consolidation of servers and includes features such as vSphere Hypervisor, vMotion and High Availability (HA) and contains vCenter Server plus also includes additional features for IT administrators and experts.

Our offered VMware vSphere Standard 1 Proc licenses are covering 32 Core.

VMware vCenter Server

VMware vCenter Server Standard 8 (LIC only)
SKU: 20001005

Short Description:

VMware vCenter is powerful server management software. It provides a central platform for managing VMware vSphere environments and enables reliable automation and provisioning of virtual infrastructure across the hybrid cloud.

vCenter Server is licensed per instance. Each instance requires a license. The underlying hardware is irrelevant.

VMware vRealize Operations Advanced / VMware vRealize Operations Standard

VMware vRealize Operations 8 Adv 1 CPU (LIC only)
SKU: 20001007

VMware vRealize Operations 8 Std 1 CPU (LIC only)
SKU: 20001006

Short Description:

VMware vRealize Operations (now VMware Aria Automation) is a software platform that helps you build and manage heterogeneous hybrid cloud environments - infrastructures that span virtual, physical and cloud environments.

VMware vRealize Operations supports proactive management and helps plan capacity, optimize server utilization and optimize the virtualization platform.

VMware vRealize Operations Standard provides intelligent operations management with a unified platform for vSphere for organizations of all sizes.

VMware vRealize Operations Advanced is an intelligent operations management solution for physical, virtual and cloud infrastructures with support for third-party infrastructure management packages.

Microsoft Portfolio

SQL Server Enterprise / SQL Server Standard

MS SQL Server 2022 Enterprise (2 Core)
SKU: 10000556

MS SQL 2019 Enterprise (2 Core)
SKU: 10000412

Short Description:
SQL Server Enterprise edition is ideal for applications requiring mission critical in-memory performance, security and high availability.
With SQL Server Enterprise edition, customers who have licensed all physical cores on the server can run an equivalent number of VMs of the software in a number of OSEs equal to the number of core licenses assigned to the server.
No additional SQL CALs are required.

MS SQL 2019 Standard (2 Core)
SKU: 10000411

Short Description:
For customers who cannot count users or require premium database capabilities, Microsoft licenses SQL Server in a core-based licensing model. Core-based licensing gives customers a more precise measure of computing power and a more consistent licensing metric. The Per Core model allows access for an unlimited number of users or devices to connect from either inside or outside an organization's firewall. With the Per Core model, customers do not need to purchase additional client access licenses (CALs) to access the SQL Server software.
A minimum of four core licenses are required for each VM on the server.

Windows Server Datacenter / Windows Server Standard

MS Windows Server 2025 Datacenter (2 core)
SKU: 10000585

MS Windows Server 2022 Datacenter (2 core)
SKU: 10000552

MS Windows Server 2019 Datacenter (2 Core)
SKU: 10000367

Short Description:
Windows Server is Microsoft's server operating system, Windows Server Datacenter is ideal for highly virtualized datacenters and cloud environments.
Windows Server Datacenter is licensed by physical core, licenses are sold in 2-packs and 16-packs.
Minimum license requirements
• All physical cores must be licensed
• 8 core licenses per processor
• 16 core licenses per server
Providing all physical cores are fully licensed, Datacenter edition allows unlimited virtual operating system environments (vOSEs).

MS Windows Server 2025 Standard (2 core)
SKU: 10000586

MS Windows Server 2022 Standard (2 core)
SKU: 10000554

MS Windows Server 2019 Standard (2 Core)
SKU: 10000366

Short Description:
Windows Server is Microsoft's server operating system, Windows Server Standard is ideal for physical or minimally virtualized environments.
Windows Server Standard is licensed by physical core, licenses are sold in 2-packs and 16-packs.
Minimum license requirements
• All physical cores must be licensed
• 8 core licenses per processor
• 16 core licenses per server
2 VMs are included in the Standard Base License once all physical cores are properly licensed.
